Summary

I am a frontend developer specializing in React and Next.js, building web applications and websites with a strong focus on clean UI and user experience. I also have backend experience with Node.js and Express, including designing REST APIs and working with databases. Currently pursuing a Bachelor's in Computer Science at WSIiZ Rzeszów, growing through every project I build.

Education

Wyższa Szkoła Informatyki i Zarządzania **Expected Graduation: April 2028**
Bachelor of Engineering in Computer Science | *Specialization: Programming* *Rzeszów, Poland*

Experience

FlyRank AI **July 2026 – September 2026**
Front-end AI Engineering Intern *Remote*

- Completed a structured front-end engineering internship focused on building and improving web applications with React, TypeScript, and modern development workflows.
- Delivered weekly assignments covering UI implementation, debugging, refactoring, database integration, and feature development using AI-assisted workflows.

Projects

RiftPick | *Website* **Next.js** | **TypeScript** | **Prisma** | **PostgreSQL** | **Clerk**

- Built a fantasy esports platform for League of Legends fans, featuring card collecting, pack opening, lineup management, roster locking, rewards, and live leaderboard.
- Engineered an automated scoring pipeline that imports match statistics through the Google Drive API, parses per-map data, calculates player scores, and finalizes leaderboard results in a single atomic transaction.
- Integrated the Leaguepedia API to automatically sync players, teams, images and the full season schedule, combined with a matchday locking system that locks and unlocks lineups based on the live schedule.
- Designed a relational database schema with Prisma ORM on serverless Neon PostgreSQL, modeling the full matchday lifecycle from player and card data through lineup assignments to per-map score breakdowns.

OpenStudio | *Website* | *Source Code* **React** | **JavaScript** | **Redux Toolkit** | **Web Audio API** | **Electron** | **LLM APIs**

- Engineered a browser and Electron-based DAW (Digital Audio Workstation) with core music production views including Channel Rack, Piano Roll, Playlist, Mixer, custom audio plugins and an integrated AI Agent.
- Implemented a project-aware AI Agent that analyzes the current project state and edits melodies, drum patterns, mixer settings, playlist arrangements, and other DAW project elements based on user prompts.
- Implemented a real-time Web Audio scheduling engine with transport controls, sample/instrument playback, mixer routing, metering, FX processing and offline WAV/MP3 export.
- Integrated Supabase Auth, PostgreSQL-backed project metadata and Supabase Storage to support user accounts, cloud saves, project management and local .os file workflows.

OtakuVersus | *Website* | *Source Code* **React** | **TypeScript** | **Node.js** | **PostgreSQL**

- Built a web-based guessing game where users identify anime titles from scene images, featuring single-player and real-time multiplayer game modes with an Elo-based ranking system and persistent leaderboard tracking.
- Developed a modular Node.js/Express REST API in TypeScript with server-authoritative multiplayer sessions, shared round state, synchronized timers and latency-safe match resolution to keep competitive matches fair and consistent.
- Designed the PostgreSQL/Prisma data layer for users, matches, scores and rankings with optimized client-server data fetching using TanStack Query.

Skills

Languages: TypeScript, JavaScript, C#, HTML, CSS, SQL, T-SQL

Frameworks / Libraries: React, Next.js, Node.js, Express, Redux Toolkit, Electron, Prisma, TanStack Query, Tailwind CSS

Databases: PostgreSQL, SQL Server, Azure SQL

Tools & Platforms: Git, GitHub, Vercel, Clerk, Neon, Render, Supabase, Vite, Cursor, Codex, OpenCode, Vitest

Spoken Languages: Polish (Native), English (B2)

Certifications

AI Foundations, Applied AI Foundations, Agents and Workflows | *OpenAI*

Full-Stack Engineer Career Path, Front-End Engineer Career Path | *Codecademy*

I agree to the processing of personal data provided in this document for the purposes of the current and future recruitment processes pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
