SUMMARY

I am a full-stack developer specializing in React, Next.js, and Node.js, building web applications and websites with real backend logic behind them. I have experience across the stack - from crafting clean frontends to designing APIs and working with databases. Currently pursuing a Bachelor's in Computer Science at WSliZ Rzeszów, continuously growing through every project I build.

EDUCATION

Wyższa Szkoła Informatyki i Zarządzania

Bachelor of Engineering in Computer Science | Specialization: Programming

Expected Graduation: April 2028

Rzeszów, Poland

PROJECTS

RiftPick | *Website*

Next.js | **TypeScript** | **Prisma** | **PostgreSQL** | **Clerk**

- Built a fantasy esports platform for League of Legends fans, featuring card collecting, pack opening, lineup management, and a live leaderboard - deployed on Vercel with a serverless Neon PostgreSQL database
- Engineered a scoring pipeline that authenticates with Google Drive via a Service Account, downloads external match statistics exports, parses the data and computes per-map scores using role-specific weighted categories, then finalizes results in a single atomic transaction across lineup slots, score breakdowns and leaderboard rankings
- Integrated Leaguepedia API to automatically sync players, teams, images and the full season schedule - combined with a matchday locking system that locks and unlocks lineups based on live schedule
- Designed a relational database schema with Prisma ORM on serverless Neon PostgreSQL, modeling the full matchday lifecycle from player and card data through lineup assignments to per-map score breakdowns

OpenStudio | *Website* | *Source Code*

React | **JavaScript** | **Redux Toolkit** | **Web Audio API** | **Electron**

- Engineered a browser and Electron-based DAW (Digital Audio Workstation) with core music production views including Channel Rack, Piano Roll, Playlist, Mixer and custom audio plugins
- Implemented a real-time Web Audio scheduling engine with transport controls, sample/instrument playback, mixer routing, metering, FX processing and offline WAV/MP3 export
- Integrated Supabase Auth, PostgreSQL-backed project metadata and Supabase Storage to support user accounts, cloud saves, project management and local .os file workflows
- Managed complex DAW state with Redux Toolkit, covering patterns, clips, channels, mixer inserts, MIDI import/export, note editing, sample settings and project persistence
- Designed a tokenized theme system and custom UI components for the entire interface, making it easy to create and maintain new application themes while keeping DAW shell styling separate from plugin interfaces

OtakuVersus | *Website* | *Source Code*

React | **TypeScript** | **Node.js** | **PostgreSQL**

- Built a web-based guessing game where users identify anime titles from scene images, featuring single-player and real-time multiplayer game modes with an Elo-based ranking system and persistent leaderboard tracking
- Developed a modular Node.js/Express REST API in TypeScript with server-authoritative multiplayer sessions, shared round state, synchronized timers and latency-safe match resolution to keep competitive matches fair and consistent
- Designed the PostgreSQL/Prisma data layer for users, matches, scores and rankings with optimized client-server data fetching using TanStack Query

SKILLS

Languages: TypeScript, JavaScript, C#, HTML5, CSS, SQL, T-SQL

Frameworks / Libraries: React, Next.js, Node.js, Express, Redux Toolkit, Electron, Prisma, TanStack Query, Tailwind CSS, Shaders.js, Vitest

Databases: PostgreSQL, SQL Server

Tools & Platforms: Git, GitHub, Vercel, Railway, Clerk, Neon, Render, Supabase, Azure SQL, Vite

Spoken Languages: Polish (Native), English (B2)

CERTIFICATIONS

Full-Stack Engineer Career Path | *Codecademy*

Front-End Engineer Career Path | *Codecademy*

I agree to the processing of personal data provided in this document for the purposes of the current and future recruitment processes pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
